

The rewards of becoming more energy efficient

Becoming energy efficient through quick and easy lighting improvements ensures your energy efficiency goes up and your electricity costs go down.

On a larger scale, using less electricity helps the environment, which benefits everyone. In fact, your participation in this program sends a message about how your business is supporting a cleaner environment – for your customers, your community and Ontario.

More ways to participate in your community

Enrol in *peaksaver*[®] for business - We'll install a programmable thermostat or switch that will allow your central air conditioning system to be automatically adjusted when demand for electricity is the highest. It will happen occasionally in summer, but only on weekdays, during the middle of the day.

With the Power Savings Blitz get \$1,000 of energy-efficient lighting for your business free

Centre Wellington Hydro, together with the Ontario Power Authority is pleased to offer the Power Savings Blitz.

The Power Savings Blitz provides qualifying small businesses with free* energy-efficient lighting improvements of up to \$1,000† (including installation) - all with the aim of helping businesses like yours become more energy efficient.

Rest assured, you don't need to buy any equipment or pay any fees in order to participate.

How the Power Savings Blitz works

Call 1-877-66-BLITZ(25489) or email psb@burmanenergy.ca to schedule a FREE electricity assessment. An installer will then visit your business and take you through simple steps that will help you become more energy efficient and save money on your electricity bill.

These steps are:

STEP 1 What's Needed?

Our Power Savings Blitz representative will quickly assess how your business can become more energy efficient, mainly through upgrading your lighting.

STEP 2 You Decide

The representative will take you through the completed assessment of your business' lighting options, which includes the estimated savings on your monthly electricity bill. With the assessment:

- you will select the options that best suit your business' needs. The first \$1,000 of improvements, including installation, is free.

STEP 3 We Install

We will arrange for one of our licensed electrical contractors to come in and make the improvements at a time that's most convenient to you. The improvements will not create any disruption to your customers or business operations.

- you may also choose to invest in other improvements shown on your assessment which may be over the initial \$1,000. There is absolutely no obligation to make these additional improvements.
